

Smart meets Safe

Print wristbands and labels
on demand from the same
printer almost anywhere –
that's smart!

Protect patients from
errors through bar
code thermal printing –
that's safe!

Introducing the TrustSense™ Patient ID Printing Solution

Designed with both IT and Nursing in mind, it's the
smart and cost-effective way to be more productive,
while ensuring best practices for patient safety.

From the leaders in mobile printing and healthcare
identification.

Smart

TrustSense™ Patient ID Printer Solution

The model TD-2130NHC healthcare thermal printer by Brother uses TrustSense™ smart technology to help protect patients, while providing peace of mind and efficiency to caregivers. Unlike standard thermal printers, it provides complete portability to follow the needs of your patients and applications—not a power outlet. Put it to work in virtually any area of your hospital.

- Why invest resources on thermal printers that can only print one form of media?
- TrustSense™ smart technology allows users to easily load and print both wristbands and labels without special set up, providing maximum flexibility and value.
- Once loaded, the printer calibrates itself with no intervention to verify media size and set the proper print density for each type of media. This takes the guesswork of out of printing.
- For superior quality and performance, the printer only uses TrustSense™ media from PDC Healthcare— a trusted leader in positive patient identification for more than 55 years.

Complete Portability

Safe

Protect Patients at Point-of Care

Accommodates Both Wristbands and Labels

Distractions, interruptions, and increase of workload are among the more common factors linked to identification and medical errors. The TrustSense™ patient ID printing solution helps healthcare organizations address these challenges to improve patient outcomes and enhance clinical efficiency.

- Printer's transportable, wireless format empowers clinicians to administer care directly where it's needed most—with the patient at almost any point of care location (from a workstation in Admissions to a cart at patient bedside, and everywhere in between).

- With optional WLAN interface and optional Li-ion battery power, it provides a level of mobility that traditional thermal printers can't offer.
- To improve patient safety, the printer's Bar Code Point of Care (BPOC) technology allows for real-time verification of patient identification, medication, dose, time and route. This automated process alerts caregivers to potential harmful errors before they occur, helping to protect patients, provide peace of mind for clinicians, and maintain compliance with important patient safety regulations.

TD-2130NHC Printer by Brother

Prints Both Wristbands and Labels

Easy to read, face-up printing. Quickly print accurate bar codes and text at 300 dpi at up to 6 inches per second. Superior reliability, accuracy, and speed help reduce downtime and increase workflow efficiency.

Comes with easy to use Windows software application to design, customize, and print wristbands and labels.

Intuitive Control Panel

Simple to use with easy to understand tri-color LED alerts

Optional Large LCD Display

Easy to see with fully adjustable viewing angle.

Latch Release Points

Conveniently located on both sides of printer.

Attractive Industrial Design

Optional long-life rechargeable Li-ion battery

For complete mobility, printer can be powered with Li-ion battery.

AC power comes standard.

Compact Footprint

Easily fits on carts or crowded desktops.

TrustSense™ Media

by PDC Healthcare

Superior Selection, Quality, and Durability

- Choose from a wide selection of wristband and label sizes.
- Benefit from consistently accurate scan rates for positive patient ID.
- Designed to meet specific environmental requirements (NICU, laboratory, long-term care, etc.)
- Durable to stand up to the test of time and maintain effectiveness for longer than the average patient stay.

Wristbands Help Protect Patient & Their Data

- Smooth, soft materials with contoured edges are safe to the most delicate skin.
- To help protect patient data, wristbands are resistant to common fluids, including 70% Isopropyl alcohol, alkaline detergent, and hand lotion.
- Multiple closure options and tamper-evident material prevent transfer of wristbands.
- Antimicrobial coating protects wristbands from bacteria, preventing degradation and discoloration.

Compare Features Against the Leading Competitor

TD-2130NHC

	TD-2130NHC	Leading Competitor
	Warranty 2-years for printer and print head	1-year for printer, 6-months for print head
	LCD Display & Touch Panel Optional backlit display and programmable keypad allows user to customize the printer for use in many applications	No option for LCD Display / Touch Panel
	Media flexibility Prints both wristbands and labels, providing more flexibility and SKU reduction	Prints wristband only
	Color-Coded Alert Snaps Accommodates color code alerts on bands via PDC Healthcare's alert snaps	Does not support color code snaps or clasps Must use additional colored bands for alerts
	Printer + Media Cost Lower Printer Cost ASP Lower Media Cost ASP (per wristband)	Higher Printer Cost ASP Higher Media Cost ASP (per wristband)
	Transportability Fully transportable (with optional battery)	Not transportable (no battery option)
	Connectivity Option Ethernet – included at no additional cost WLAN – at an additional cost. WLAN option can be added after point of purchase.	Ethernet – at an additional cost WLAN – at an additional cost Either option must be decided at the point of purchase.

Optional LCD Display and Touch Panel with Programmable Keys

LCD Display
Easy to read large backlit display

Programmable Touch Panel
Touch Panel Keys can be easily programmed to automate multiple tasks.

Use the built-in real time clock/ calendar to automatically print the draw time for collection of blood and specimens; designate wristband and label printing applications; search and print from downloaded databases; organize assignments of clinicians, and more!

Programming function enables users to easily record and reproduce patient data for re-banding. Perfect for printing during downtimes.

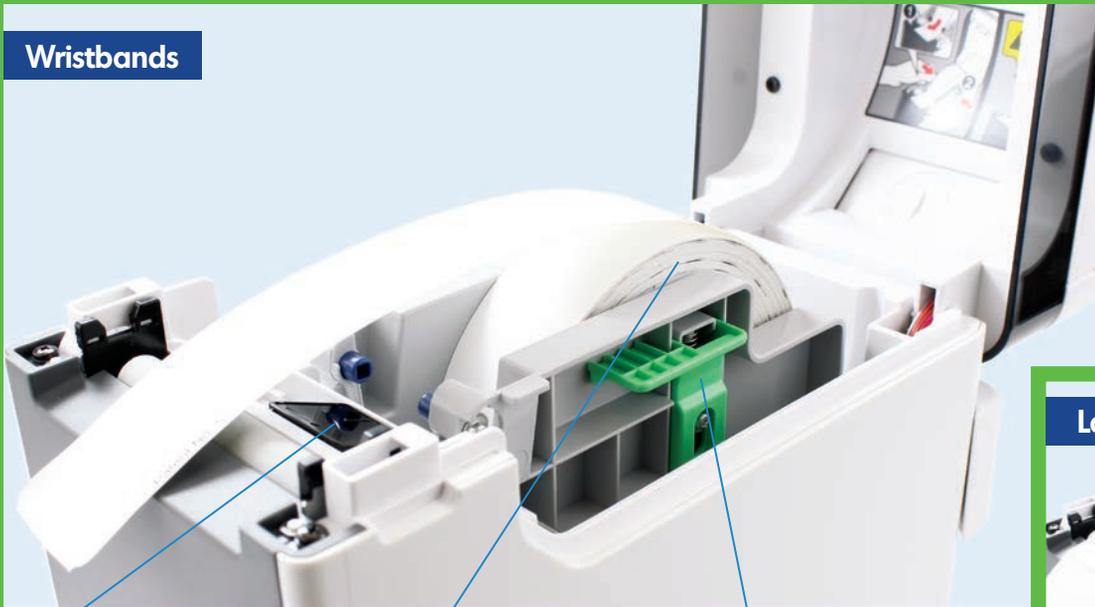

Maintain Compliance with Important Industry Regulations

The TrustSense™ Patient ID Printing Solution helps caregivers identify the correct patient and match them to the right medication, specimen, or procedure. This measure of patient safety helps organizations to maintain compliance with important patient safety regulations, including:

- The Joint Commission Patient Safety Guidelines
- HIPAA requirements for protection of patient privacy
- AHA guidelines to reduce the risk of lost or transferred data
- Centers for Medicare & Medicaid Services (CMS) Stage 2 requirements for Electronic Tracking of Medication by 2014

Easily Accommodates Both Wristbands & Labels

Wristbands

Innovative Spindle-less Design
Simply drop in the roll and you're ready. Saves time loading media, while removing the guess work from printing.

Labels

Smart Media Sensor

TrustSense™ smart technology senses the right media and automatically calibrates itself with no intervention to verify media size and set the proper print density for each type of media.

Large Media Capacity

Accommodates over four times more wristbands or labels than a mobile printer.

Works with roll media up to 5 inches in diameter.

One-Touch Adjustment for Wristbands and Labels

Allows quick and easy transition to other media.

Product Number	Description
